### Portable vulcanisation press

With reference to our earlier talks, we kindly ask you to verify your quotation according to our more precise requirements:

- Width of the belt: 1200 mm
- Preferred parameters of parts: mm
  - Height of the traverse: 140 mm
  - Width of the traverse: 150 mm
  - Screw opening: 35 mm
  - Heating plate: 1260 x 560 mm
- Heating temperature: 160°C
- Vulcanisation pressure: 10 bar
- CE certificate

The following information is also needed:

- Guarantee period
- Weight of the single element, material of which the press is manufactured
- Time needed to reach peak temperature at given pressure
- Heating medium
- Energy consumption
- Kind of steering
- Time of delivery

Below listed criteria will be considered for the purchase:

- Price (factor 85%)
- Dimension of the press elements (factor 10%)
- Weight (factor 5%)

Deadline for placing offer is 23.10.2014

Yours sincerely,  
Danuta Szumska
